Push Button Paging

Restaurant Paging System

HME WIRELESS™ Onsite Paging

Improve Service & Customer Experience

Push Button Paging System empowers your guest to manager their restaurant experience. After seating, the server shows the customer how to control their experience by pushing the appropriate button the transmitter to:

> Call the server to the table
> Ask for the check
> Request a manager to visit the table

Benefits include:

> Increases check average
> Improves customer experience
> Increases table-turns
> Gives servers or managers the opportunity to respond to customer concerns, turning a potential bad experience into a good experience

Guest feel confident that their needs will be met with Push Button Paging. You will be confident that you are providing excellent customer service resulting in quicker table-turns and happy customers, both leading to increased sales.

Push Button Paging Highlights

> **Simple Self-Installation**
No electricity is required at the table. No WiFi is used.

> **Easy to Use**
Simply sync the Push Button transmitter to the server and manager pagers to assign tables. A quick, 2-step process allows you to reassign tables on the fly.

> **Completely Wireless**
No messy wires or electrical cords need on your tables.

> **No Software Required**
Other table paging systems require expensive and complicated software licenses. Push Button Paging System is all you need! Simply sync the transmitters to the server pagers and watch your customer service improve.

> **Rechargeable**
Unlike the competitor's systems, Push Button Paging transmitters are rechargeable.

> **Small Footprint**
Push Button Paging transmitters stack neatly.
